

# actidata Storage Systems

We care about **Your** Data

Company Profile

actidata Storage Systems designs, engineers and produces professional storage solutions for entry, midsize, and large IT environments, offering services in data backup, data archiving, data management, and system recovery. An experienced team of well educated engineers and technicians work out tailor-made storage solutions which meet customer's expectations and budgets. A huge number of corporates, large workgroups, and small companies already trust in actidata's storage and backup systems.

- Combined NAS and Backup Systems
- Backup and Archive solutions based on LTO Technology
- Windows or Linux based Nearline Storage Systems and Storage Extension Units (JBODs)
- System Platforms for Backup, NAS and Nearline Storage

Frank Roszyk,  
General Manager / CEO  
actidata Storage Systems GmbH

"Based in our long-term experiences in data storage, backup, and archiving we are realizing products and tailor made solutions meeting customer's requirements. Ask for your storage solution - We are ready to support you!"

## Our Focus

- **Teamwork:**  
Our people are the base of our success. Hand in hand and fully motivated to fulfil customer's need leads us every single day.
- **Innovation & Quality:**  
We are going forward. Combining ideas based on experiences, knowledge and inspirations grand the next steps in innovation, business, and product development.
- **Focus on Customers:**  
Our customers lead our activities. Independent from budget, size and location we are aiming to fulfill the customer's requirements in the best manner and create tailor made solutions for customer's IT environment.

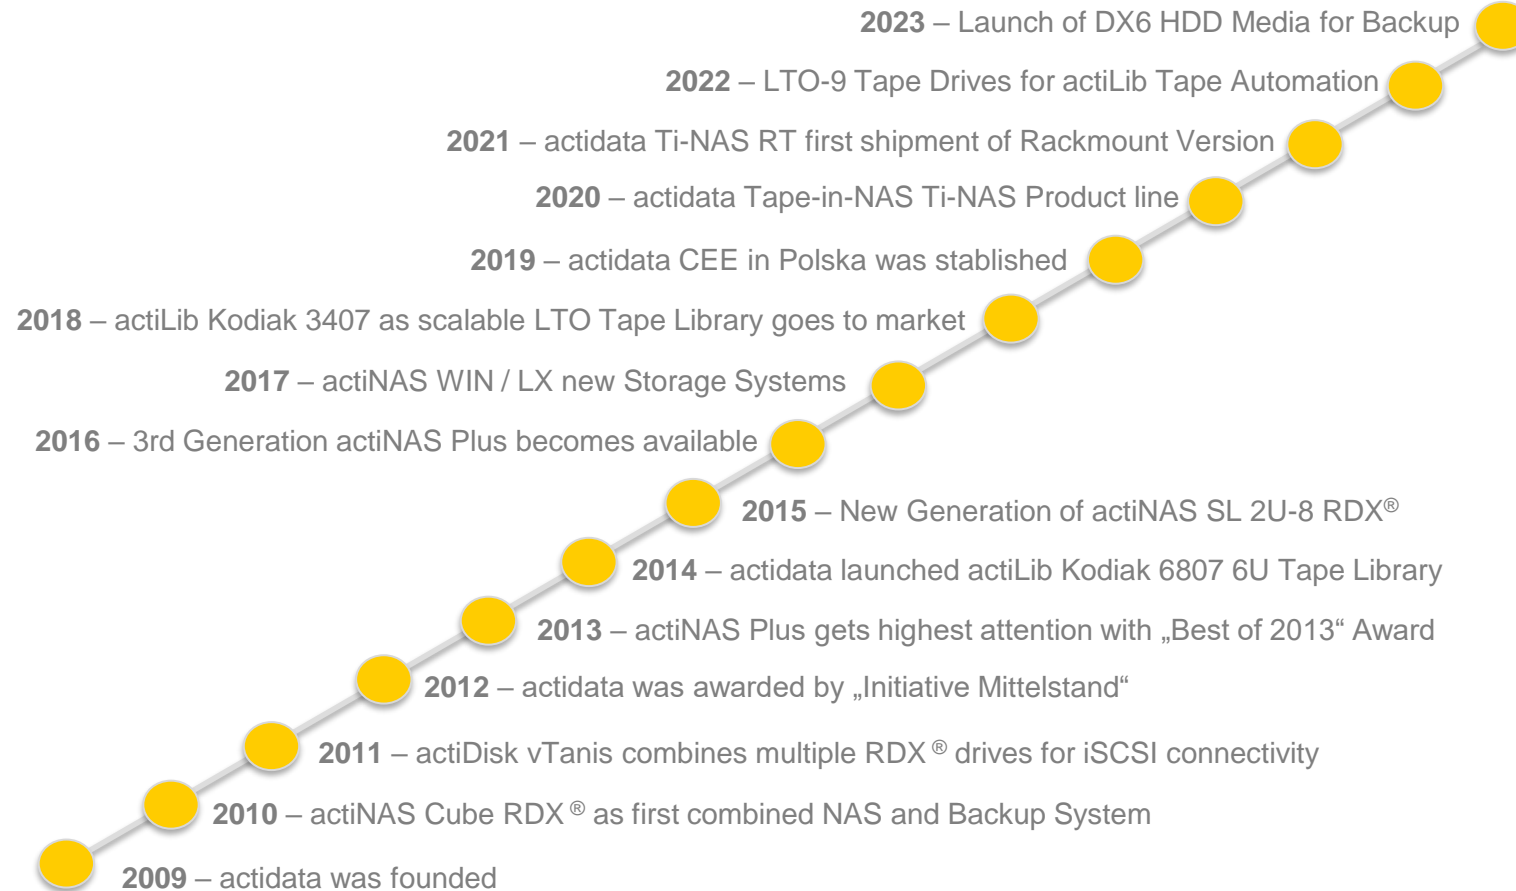

## Our Service

- 3 Years limited Warranty on actidata's Backup and Storage Systems
- Advanced Replacement Service included (FES Fast Exchange Service)
- Service and Warranty extensions up to 60 Months as Option available
- Onsite-Service available, based on customer's request

## Our Mission

- Creating proven Systems and Solutions meeting customer's requirements.
- Offering well balanced price structure for building up an extraordinary relationship to business partners and end-users.
- Living a fair and stable company culture and maintain employees into new knowledge levels.
- Stabilize the business in Europe to fulfil the expectations of actidata's management and shareholders.

## Our Milestones:

Supported by:

**veeam**  
**Acronis**  
**VERITAS**

 **Barracuda**

**ARCHIWARE**

**NOVASTOR**

**arcserve**

**SEP**  
Backup & Disaster Recovery

... and others.

## LTO Tape Automation Systems

- 1U and 2U – proven LTO Tape Autoloader and LTO Tape Libraries.
- 3U and 6U highly scalable LTO Tape Libraries up to 42U with more 25 PetaByte capacity.
- Support of LTO-7, LTO-8, LTO-9 Tape Technology for SAS and Fibre Channel Interface Topology.
- Supported by most common backup, archive and tape management software.  
Like: Veeam, Commvault, Veritas BackupExec, SEP, Acronis, Storage Spectrum, Legato, Archiware and more.

## Combined NAS and Backup Platform with integrated LTO Tape Drive

- 2U rackmount solution.
- Open platform based on „Windows Server IoT for Storage“.
- Free choice of Backup Software with installation, operation and management by user.

Supported by e.g.:

VEEAM Acronis VERITAS  Barracuda

ARCHIWARE  NOVASTOR arcserve  SEP  
Backup & Disaster Recovery

- Integrated LTO Tape Drive  
for backup data to exchangeable media

## Combined NAS and Backup Platform with NEW DX6 Media Technology

- Desktop Solutions.
- Open platform based on „Windows Server IoT for Storage“.
- Free choice of Backup Software with installation, operation and management by user.

Supported by e.g.:

veeam Acronis VERITAS  Barracuda

ARCHIWARE NOVASTOR arcserve  SEP  
Backup & Disaster Recovery

- Integrated DX6 Frame  
for backup data to exchangeable media

## Backup and Disk Server

- 2U, & 4U rackmount storage systems.
- Based on Linux or Microsoft Windows Server IoT for Storage.
- Single or dual CPU systems.
- Tailor-made storage solutions with high performant LAN interfaces and hardware RAID controller.
- SAS interface for connection to LTO tape autoloader and LTO tape libraries.
- JBOD storage extensions for cascading storage systems >1 PetaByte.

Vorbereitet für den  
Einsatz mit:

**veeam**

**Acronis**

**VERITAS**

 **Barracuda**

**ARCHIWARE**

**NOVASTOR**

**arcserve**

**SEP**  
Backup & Disaster Recovery

... and others.
